

Alikaramaki - 810198519

Worksheet - C-A4

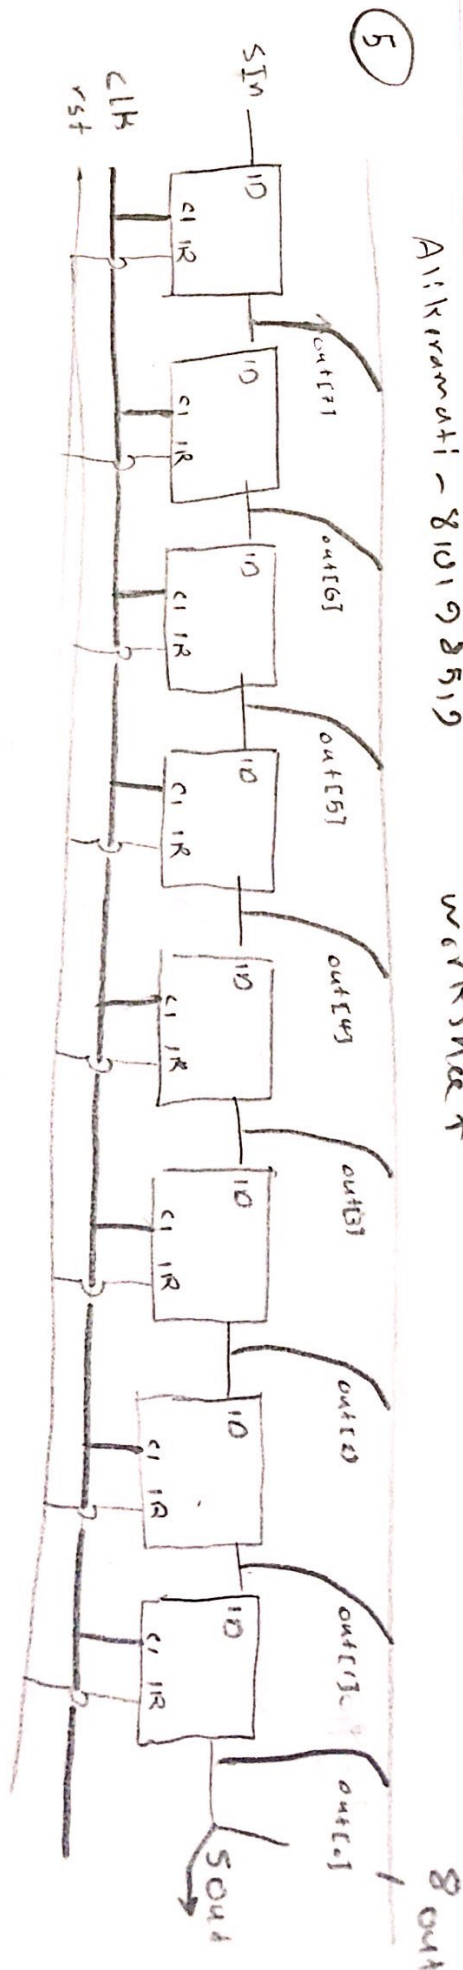

$$4 + 4 = 8$$

for nand

5 Alternati - 810192519

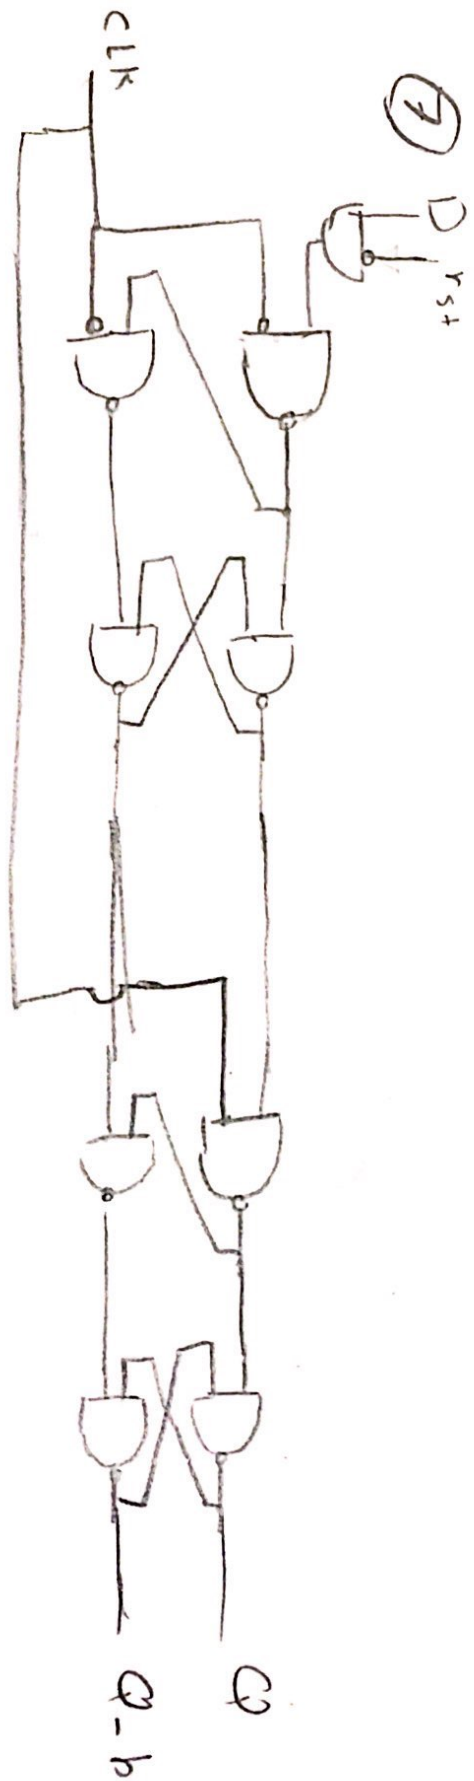

Worksheet

- 6 because of transparency, our circuit doesn't work as we expected and 0 input propagates as long as clk is 1. So it is not edge triggered and we will have too many 0 inputs propagating during clk is 1.
